As MAZI ORMAN ÜRÜNLERİ company, We set off to transform forest products, which have commercial importance in the construction sector, into living spaces suitable for the texture of nature by using them in all areas of life and in all kinds of environments.

At the point we have reached today since our foundation year 1960, We are proud of being the preferred company in the forest products sector in our facilities, which we have strengthened with advanced technological machinery, equipment and qualified staff without allowing any difference in quality.

OUR PRODUCT RANGE AND PRODUCTION FACILITY

In our company headquarters, many Chipboard, Melamine coated Chipboard, Mdf, Mdflam etc. operating in Turkey and international markets. manufacturers have regional distributorships and sales representatives, and these products are sold in wholesale and retail.

In addition, wholesale and retail sold in forest industry products such as panel door surface, cover profile, ready-made covers, solid, laminate and laminated parquet, insulation products, OSB, plywood, glue.

The import group within our company; It meets your needs by supplying pine, larex, spruce derived lumber and laminated wood elements from Ukraine, Siberia, Sweden, Finland and Balkan Countries.

In our Starwood Construction Market, which is located in the headquarters, companies operating in the construction and wooden furniture decoration sector and our end user customers can easily find all kinds of building and decoration materials which they looked for at one point with the most affordable prices.

Our wood production facility, located in the center of Denizli on the area of 15.000 m², with state-of-the machinery park and qualified staff, produces a wide range of wood products at international standards and quality.

In addition to the products we have mentioned above, our company constantly renews and develops its product range in accordance with the needs and demands of the sector without sacrificing quality.

OUR MISSION

Adding Value to Living Areas with Wood.

Our top priority is to add value to living spaces. It is the main mission of our company to work to offer the best to our customers, to expand our product portfolio by closely following the technology, to add value to the human life quality and areas of our products that we produce and sell.

Our aim is to provide the best quality and perfect service and to be accessible anytime by aiming the understanding of the right product and quality workmanship.

OUR VISION

As a leading company that has achieved high quality standards in the wood decoration and forestry products sector, being one of the preferred companies of Turkey that respects the environment and nature is the main vision of our company.

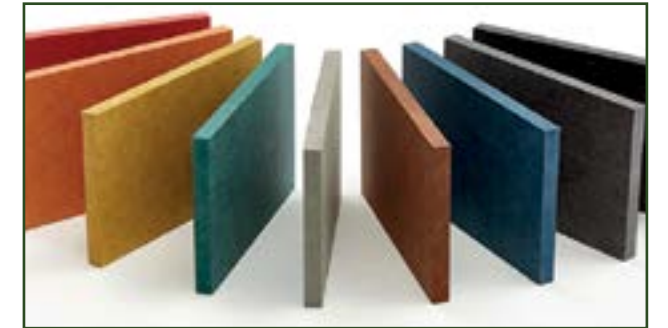

OUR QUALITY STANDARDS

One of the main principles of our company is to make production or sales without sacrificing the right project and the right material, to maintain our quality standards within the framework of durability, continuity and longevity, to equip our production units with a fully equipped staff and advanced technology machine park in line with continuous improvement, and to ensure that the sector can be supplied at affordable prices.

INDUSTRIAL FORESTRY PRODUCTS

INDUSTRIAL FORESTRY PRODUCTS

1A-MDF AND MDF LAM GROUP

It is possible to supply all kinds of industrial forest products used as a standard in the building and furniture sector from the Industrial Forest Products group, which is one of the main fields of activity of our company, as wholesale or retail.

We constantly update and diversify our products in line with the demands of our customers and the needs of the sector.

You can supply all the products we have specified within the Industrial Forest Products Group with many different brand alternatives.

PRODUCT GROUPS

- 1A** - MDF AND CHIPBOARD TYPES
- 1B** - LAMINATE, LAMINATED AND SOLID PARQUET
- 1C** - DOOR WING, FRAME, SCREW AND SANDWICH PANEL TYPES
- 1D** - NATURAL AND ARTIFICIAL (ALPI) COATING
- 1E** - PLYWOOD
- 1F** - INSULATION MATERIALS

Products such as MDF, chipboard and melamine coated chipboard produced by AGT, Çamsan, Diva, Yıldız Entegre and Yıldız companies operating within our company, which are used extensively in interior and exterior decoration projects, are sold in wholesale and retail.

Mdf, Chipboard and its varieties are produced and offered to the market in thicknesses between 03mm and 40mm as standard and in various sheet sizes.

PRODUCTS

- * MDF
- * Mdfлам
- * High Gloss Mdfлам
- * Acrylic Mdf Panels
- * Hardboard
- * Chipboard
- * Natural and Alpi Coated MDF - Chipboard
- * Painted MDF and Chipboard

INDUSTRIAL FORESTRY PRODUCTS

1B-LAMINATE, LAMINATED AND SOLID PARQUET GROUP

Parquet; It is the most important element in interior decoration because we are always on it in the environment we live in and it is always in sight. Compared to other flooring materials, parquet is natural and It has become the most preferred floor covering material of today due to its warmth, aesthetics, reflecting the different colors of nature, and insulating heat and sound.

Our company carries out marketing and application activities in the domestic market for the products of many companies that produce imported-domestic parquet and parquet by-products. It adds color to your spaces by offering affordable prices and quality service understanding in your retail, wholesale and project-based works with our strong supply, stocking and distribution capacity with laminate, laminated and solid parquet alternatives.

In addition, we provide services with our Industrial Solid Parquet types, which are completely our own production. Industrial solid parquets, especially used in areas exposed to heavy human traffic, add warmth to the spaces with their high strength. It is produced from hardwoods such as Oak, Iroko, Walnut and Beech.

PRODUCTS

- * Laminated parquet
- * Laminate parquet
- * Solid Parquet
- * Industrial Solid Parquet
- * Parquet accessories (skirting board, mattress, transition and end profiles)
- * Complementary materials (glues, primers, varnishes, etc.)

INDUSTRIAL FORESTRY PRODUCTS

1C-DOOR WING, FRAME, SIDE AND SANDWICH PANEL TYPES

Today, we produce finished and semi-finished door leaf, frame and jamb systems, which are heavily demanded by door manufacturers, for the demands of our customers and the needs of the sector, and we offer them to the market as wholesale or retail.

In our wooden integrated facility, our company produces pine or spruce door frames with or without lengths according to the needs of our customers. And our solution partner also imports door frames from foreign companies and meets the needs of the sector.

Vario and Venni brands doors ready to install, which manufactured within our company, are available in our stocks.

PRODUCTS

- * 30mm and 40mm MDF Door Frame
- * Sandwich Panel Frame
- * Natural and Artificial Coated frame and Frame Profiles (winding system)
- * Paintable PP Paper Lined Door Frame and Molding Profiles
- * Printed MDF Door Frame
- * Patterned MDF Door Panels
- * American Door Panels
- * Preset Molding Profiles
- * Door Spans (with or without length)
- * Door Fill Honeycombs

INDUSTRIAL FORESTRY PRODUCTS

1D-NATURAL AND ARTIFICIAL WOOD FLOORING GROUP

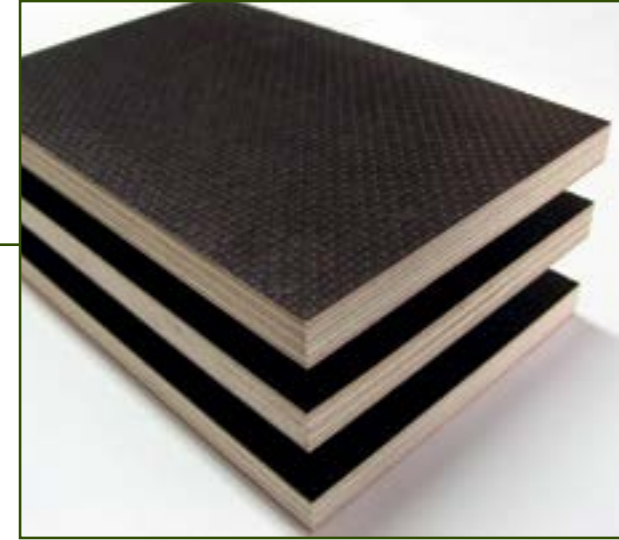

We provide your natural and artificial coating needs, which are used extensively in the field of furniture decoration, with our wide product range.

Veneers are classified according to their types as natural wood veneer, industrial wood veneer (alpi veneer) and root veneer. According to the cutting shapes, natural wood veneers are diversified into two types as moire and milling.

Standard coating between 0.55-1 mm according to the thickness of the coatings, Between 1-4 mm is called papel coating.

You can supply all kinds of domestic, exotic, root and alpine veneers and door-length veneers from our company.

INDUSTRIAL FORESTRY PRODUCTS

1E- PLYWOOD GROUP

We also serve with plywood and playwood varieties, which are the basic materials of the construction, decoration and furniture industry.

Plywood and playwood, obtained by the peeling method, are arranged opposite each other from many types of wood layers and phenolic resin.

It is a thin panel bonded with high heat and pressure using adhesives. It is produced in various sizes and in different thicknesses between 4mm and 40mm. Plywood and playwood products are produced in various thicknesses and sizes, and they are called standard and marine plywood, filmed and unfilmed plywood. In general, exotic wood varieties, beech, poplar, pine, birch and combi (different

wood combination) are used as tree species.

You can also supply flexible plywood products, which are technological products that have started to be used in architectural design and furniture production.

4mm to 40mm thicknesses as standard, 1250mm x 2500mm and 1700mm x 2200mm is produced.

PRODUCTS

- * Standard Plywood
- * Marine Plywood
- * Flexible Plywood
- * Plywood with film and Unfilm

SYPLY PLYWOOD

INDUSTRIAL FORESTRY PRODUCTS

1F-ISOLATION PRODUCTS GROUP

You can supply all kinds of heat, water and sound insulation products used as sub-insulation material in building applications (roof, facade and floor covering) from our structure.

In addition, imported and domestic production; OSB is supplied and sold in 9mm, 11mm, 15mm and 18mm thicknesses.

PRODUCTS

- * OSB (Oriented Strand Board)
- * Shingle Decorative Roof Flooring
- * Thermal Insulation Foams (Styrofoam, Xps)
- * Stone and Glass Wool
- * Waterproofing Membranes
- * Steam Stabilizer (Tyvek)
- * Parquet Mattress and Xps Products
- * Silicone and Insulation Tapes
- * All kinds of liquid insulation products

TIMBER AND PRODUCTION GROUP

3A-CONSTRUCTION TIMBER

You can supply your construction timber needs, which is an indispensable product of the construction industry with the competitive prices from our company.

Standard size and non-standard special production pine and pine derivative imported and domestic timber are always available in our stocks.

TIMBER AND PRODUCTION GROUP

3B-TIMBER FOR WOODWORK, PERGOLA, INTERIOR AND EXTERIOR WOODEN DECORATION WITH ALL SOLID WOOD GARDEN FURNITURES

As a manufacturer and supplier in your wooden decoration processes, which are always involved in the construction sector, from our stock to our customers; We provide support with our semi-finished timber products made of soft, hard and exotic class timbers for wooden joinery, pergola, interior-exterior wood decoration and all solid garden building furniture.

TIMBER AND PRODUCTION GROUP

3C-SOLID LAMBRI, SOLID WOOD OVERLAY, WITH DECK IN SPECIAL SIZES AND PROFILES - FACADE - FLOOR COVERINGS

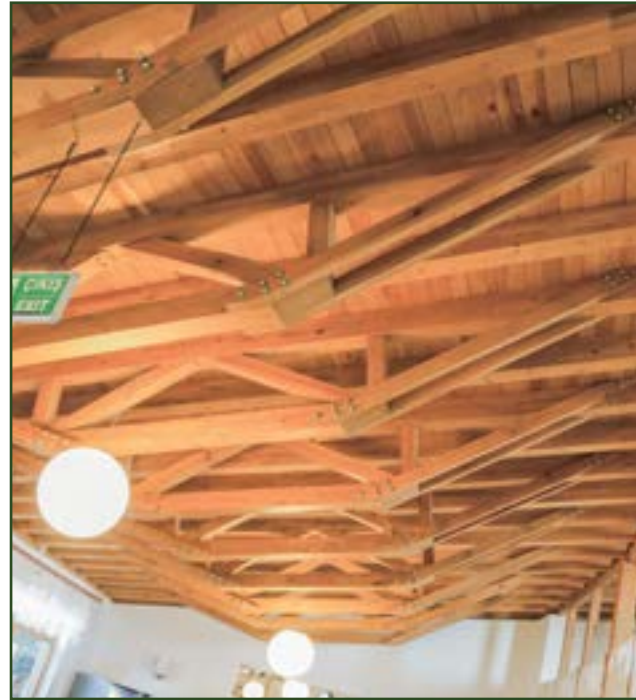

Our wooden facade and floor covering product range, which is used extensively in the interior and exterior of buildings, is constantly diversified and offered to the construction industry, taking into account our experience and the market supply-demand balance.

Wooden facade and floor coverings made of hard - soft and imported - domestic timber in various sizes, produced as standard in our company, are available in our stocks.

PRODUCTS

- * Wooden Deck Profiles
- * Wooden Joint Profiles
- * Long Length with Industrial Solid Parquet
Solid Wood Parquet Products
- * Wooden Facade Paneling Profiles
- * Wooden Sunshade Facade Profiles
- * In addition, in accordance with the demands of our customers, in the desired wood type and dimensions and shapes can be produced.

TIMBER AND PRODUCTION GROUP

3D-LAMINATED WOOD ELEMENTS

In our facilities; Laminated wooden elements are produced by using hard and soft woods in the dimensions accepted in the world standards and in special dimensions that our customers need. Columns, beams, arches, trusses and so on up to 13 meters Laminated wood elements can be produced in many different forms.

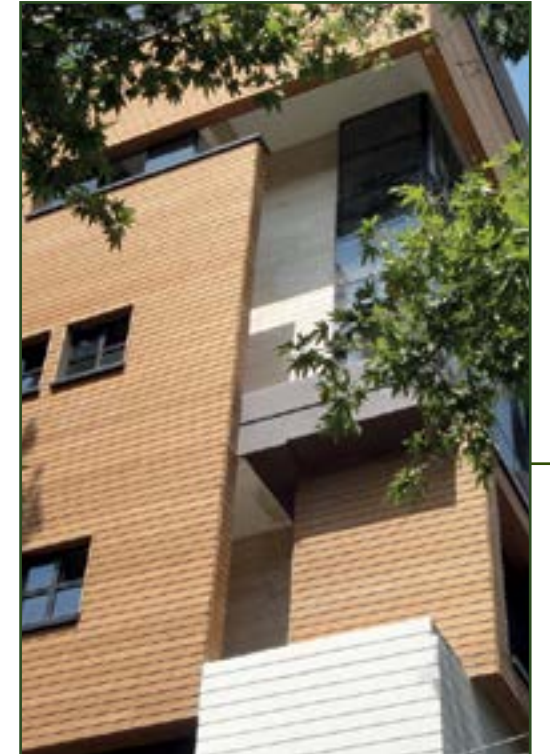

Laminated wood elements different of independent wooden layers in dimensions controlled prepared in industrial conditions and machines and consist of by combining with special lamination adhesives. In general, coniferous soft-textured woods are used, as well as exotic hardwoods and laminated wood production in line with the needs of our customers.

In addition, you can supply laminated wood elements, the dimensions given below, from our company.

STANDARD DIMENSIONS

- * 65 x 120 x 13.000mm
- * 65 x 160 x 13.000mm
- * 65 x 200 x 13.000mm
- * 90 x 160 x 13.000mm
- * 90 x 200 x 13.000mm
- * 90 x 240 x 13.000mm
- * 110 x 110 x 13.000mm
- * 140 x 140 x 13.000mm
- * 160x 160 x 13.000mm
- * 190 x 190 x 13.000mm

TIMBER AND PRODUCTION GROUP

3E-THERMOWOOD (HEAT TREATED WOOD) PRODUCTS

Our company, which has been in the building sector since the mid-2000s, sells heat-treated wood products known as Thermowood in the sector, wholesale and retail, and provides service with professional assembly teams in applied projects.

Thermowood; The raw wood is subjected to modification process of the internal temperature of the wood at 190°C -215°C in 320°C ovens with the latest technology in industrial environments without using any chemicals. It is a completely natural wood product obtained by keeping it. With the processes applied to the wood, many negativities that may occur in the wood have been reduced to a minimum and some negativities have been completely eliminated.

With the application of controlled high heat, the cellulose chains in the natural structure of the wood are broken down, acids dissolve, bacteria and etc. as microorganisms are destroyed. Most of the sugar and resin, which reduce the strength of wood and cause the wood to deform over time, are destroyed. In this way, it is fed from wood and prevents the formation of rotting fungi.

As a standard, facade and floor covering products in various sizes and dimensions are produced from Pine, Iroko, Ash wood. In addition, in line with the needs of our customers, we can produce thermowood products in different sizes and profile types that you can use in all your interior and exterior decoration works.

TIMBER AND PRODUCTION GROUP

3F-SOLID WOOD PANEL

We produce solid wood panels according to the demand of the sector in our own technological solid wood panel line. In addition, different products are supplied from local or imported solid panel companies specialized in their fields and the needs of our customers are met at the maximum level.

Many types of wood are used in the production of solid panels. We have Spruce, Pine, Beech, Oak, Walnut, Iroko, Sapele, Mixed and Filling panels in our stocks, but in line with the demands of our customers, project-based custom-made wooden solid panel production is also possible.

Solid wood panels are produced and put on the market in various sizes, with or without length joint, in five qualities: AA, AB, BB, BC, CC.

TIMBER AND PRODUCTION GROUP

3G-URBAN FURNITURE AND WOODEN LANDSCAPE ELEMENTS

With the understanding of developing urbanism and social living spaces, all kinds of urban and social living spaces wooden furniture and wooden building equipment are designed, produced and assembled in-house.

You can supply all the products mentioned on the side as finished or semi-finished products from our company, as well as our strong production capability as a solution partner in project-based applications.

PRODUCTS

- * Wooden Seating Benches
- * Wooden Picnic Tables
- * Wooden Camellias and Pergolas
- * Wooden Stops
- * Wooden Bridges
- * Wooden Entry Plugs
- * Wooden Buffet and Cabins
- * Wooden Flowerpots
- * Wooden Fences
- * Wooden Playgrounds
- * Wooden Cabanas
- * Wooden Beach Walkways
- * Wooden Park and Garden Warehouses
- * Wooden Hobby Garden Cabins

TIMBER AND PRODUCTION GROUP

3H-3H - SOLID WOOD & LAMINATED DOORS AND WINDOW SYSTEMS

In order to achieve quality and standards in the construction sector, wooden joinery profiles are produced in our facilities at world standard and norms.

Laminated wooden profiles to be used for wooden door and window systems in our production facility are produced and collected in technologically advanced machines. All types and sizes of wood joinery can be applied by using professional accessory systems.

TIMBER AND PRODUCTION GROUP

3I-IMPREGNATION AND IMPREGNATED PRODUCTS

Impregnation is the process of impregnating the wood with chemicals that will prevent the wood from rotting and fungusing with high pressure. In the impregnation process, it is aimed to increase the service life of the wood by protecting the wood from pests such as fungi, insects and maggots.

The process depends on the type of wood, the environment in which it will be used and the expected service life. Impregnated products initially have a green or dark brown appearance; this turns into a natural honey brown over time.

Any wood exposed to the open air must be protected from the weather, even if pre-protected. Impregnated products can be painted with covering or transparent products. There are also colorless impregnation products.

However, the colorless impregnation process is done with the dipping method system. In the dipping system, chemical products penetrate the wood surface with a maximum of 1-3 mm.

A new generation water-based wood impregnation material in accordance with European standards applied in impregnation plants with vacuum pressure method.

- * industrial application
- * Green (Tanalith) and Brown (Tanatone) color options
- * Water based
- * Odorless

Soft textured woods to be used by painting on the floor with a water-based impregnation material applied by dipping, which prevents the wood from rotting. (Pine etc.)

- * Application by immersion
- * Colorless
- * Odorless
- * Conforms to European norms
- * Eco friendly
- * Ready to use

TIMBER AND PRODUCTION GROUP

3J-WOOD PAINTING AND POLISH LINE

Ensuring the widespread and long-lasting use of wood as a contemporary building material, Our most important vision is to follow the developments closely, to search for the most accurate paint and polish products, and to offer the latest technology products to users and practitioners.

With our fully automatic wood paint line, we color, paint or polish all kinds of wooden elements in a homogeneous way without human touch. In addition, we can provide field paint, polish and maintenance applications with our qualified polishing team.

Our team of fully automatic paint line with polish and are serving in applications that mentioned below.

- * Water Based and Solvent Wood Coloring Applications
- * Water Based and Solvent Based Polish and Paint Applications
- * Wood Lacquer Primer and Topcoat Applications
- * Oil Based Varnish Applications
- * Wood Flooring Oils (Teak Oil and Derivatives)
- * Industrial and Heavy Traffic Parquet Polishing Applications
- * With field paint and polish applications varnish maintenance services

TIMBER AND PRODUCTION GROUP

3K-PRECISE CALIBRATION AND SANDING SERVICE

All kinds of solid materials up to 1350mm wide are sanded with precision calibration and sanding machines and are ready for paint process.

PROJECT AND APPLICATION GROUP

PROJECT AND APPLICATION GROUP

We are giving service with our architects, forestry industrial engineers, technicians and site chiefs assigned to our project and application group, and nearly 100 field assembly staff. All of our project team consists of qualified and well trained staff in occupational safety.

In addition, our project group provides wood consultancy, project and draw up a contract services for your medium-sized and large-scale projects.

Project Group Applications

- * Wooden Facade and Floor Coverings
- * Linear Wooden Ceiling Manufacturing and Installation
- * Pergola, Gazebo, Cabana Applications
- * Structural Wood Applications
- * Kent Furniture Applications (Bench, Picnic Table, Flowerpot, Stall, Trash, etc.)
